Education

University of Toronto - St.George Campus

September 2022 – April 2026 (Anticipated)

Bachelor of Science in Computer Science - Dean's Scholar 2022-2023, 2023-2024

cGPA: 3.7/4.0

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, TypeScript, SQL

Developer Tools: VS Code, IntelliJ IDEA, PyCharm, GitHub, Jira, ServiceNow, Prisma, PowerBI, Microsoft Office

Technologies/Frameworks: Linux, JUnit, ReactJS, Angular, Next.JS, ExpressJS, MongoDB, Stripe, WordPress

Experience

HomeTrust Company

May 2023 – August 2023

Summer Student: IT Digital Services

Toronto, Ontario

- Enhanced and extended the **company website**, leading to a **30% increase in website traffic** and a **15% rise in registrations** by optimizing GUI/UX design using **Angular, JavaScript, and HTML/CSS** guided by JIRA tickets.
- Automated the **routine data transfer from cloud to Power BI** for analytics, resulting in a daily **reduction of 2 hours** in workload for the employees, achieved through the development of a **Python script** integrated with **MySQL and REST APIs**.
- Implemented a solution to **automate updating personal information** for 60,000 customers, **saving over 300 hours** of manual labor, by creating **prototype solutions** using **Python, JavaScript, Angular, SQL, and REST APIs**.

Projects

Ecommerce Store + Dashboard | *TypeScript, PostgreSQL, ReactJS, Next.JS, Prisma, MongoDB, Stripe*

June 2024

- Developed an **e-commerce dashboard** enabling users to **create and manage multiple stores**, each equipped with **custom APIs** for store management, order tracking, and product addition, including administrative controls and advanced analytics capabilities.
- Created an **e-commerce store** featuring product information **sourced dynamically from the dashboard**, **equipped with filtering** options based on size, category, and more. Also implemented a fully integrated **payment gateway using Stripe** to ensure secure transaction processing.

Toronto Optimal Routes Program | *C, Graph, Min-heap, A-star Algorithm, Dijkstra Algorithm*

February 2024

- Developed a **shortest path finding application in C** for city routes in Toronto, CA, utilizing **A-star and Dijkstra algorithms**.
- Utilized **graph and min heap data structures** to compute optimal routes efficiently, **enhancing the runtime performance** of the algorithms.

Recipe Flow Application | *Java, Java Swing, Junit*

December 2023

- Collaborated on an **open-source social media app** for recipe sharing, implementing **object-oriented design, clean architecture, and Java-based development with REST APIs**.
- Designed and developed an interactive **GUI using Java Swing**, applying **Test Driven Development (TDD)** to ensure testing for enhanced user experience.

Relevant Coursework

- | | | | |
|-------------------|-----------------------|---------------------------|-------------------------|
| • Data Structures | • Algorithms Analysis | • Artificial Intelligence | • Systems Programming |
| • Software Design | • Database Management | • Web Programming | • Computer Architecture |

Leadership / Extracurricular

Institute of Electrical and Electronics Engineers

April 2023 – April 2024

Logistics Associate

University of Toronto

- Organized **two impactful hackathons** with **500+ participants** by collaborating closely with a productive and innovative team.
- Selected as a **workshop leader out of 100 candidates** for a **beginner Angular workshop** based on leadership potential and academic success.
